Pari S. Bhandarkar Front-End Developer • UI Designer

+91 7898406214 • Portfolio • bhandarkarpari@gmail.com

Featured Projects

Staple – A web based portal for farmers
September 2022

- Developed and designed the front end and UI, aimed at promoting medicinal rice varieties in Chhattisgarh, resulting in a fully-functional prototype ready for deployment.

- Created wireframes and prototypes to visualize and test user interfaces, resulting in a user-friendly design that increased the user retention rate by 25% in testing environments.

- Conducted extensive research by visiting lab centers and consulting with professionals and farmers.

Dynamic Portfolio Website
March 2023 — April 2023

✦ see all of my projects on my portfolio: 🔗 paribhandarkar.vercel.app

- Created a fully-functional portfolio website from scratch using React, resulting in a website with 100% functionality ready for deployment.

- Structured and implemented a user interface with over 20 custom components, resulting in a dynamic and engaging user experience.

- Incorporated animations and visual effects to enhance the user interface and create a memorable user experience.

Achievements

- Secured second position for the best paper presentation at the International Workshop on Emerging Trends in Science and Technology, demonstrating excellent research and communication skills.

- Achieved the second position in aptitude test at the college tech fest, showcasing strong analytical and problem-solving skills.

- Secured the third position in presentation at the college tech fest, demonstrating exceptional presentation skills and the ability to convey complex ideas effectively to an audience.

- Recognized by peers and mentors for excellence in front-end development and UI design, resulting in multiple opportunities to work on high-profile projects and develop new skills.
